BLOOMS THROUGH THE SNOW AT CHRISTMAS
Plant in Partial Shade for Best Results**

What a rare winter thrill you'll enjoy with Christmas Rose—the lovely flower that blooms outdoors in your garden in the middle of winter! Blooms, despite snow and cold! Starts to flower late October and keeps right on blooming 'til March. Christmas Roses produce an abundance of showy Rose-like white flowers with bright yellow centers. You just won't believe your eyes when you see them blooming in your yard in midwinter. Their leaves are decorative and green the year 'round. If cold catches them, the flowers will freeze solid, but when the temperature rises they will bloom as if nothing had happened! You'll see them repeat performance over and over again! Plant Christmas Roses in semi-shaded locations **protected from the hot summer sun—but where they get warm sunshine during the winter.** Ideal locations—close to or under evergreens, wooded areas, under trees in shady nooks next to walls. Grow 8 to 12 inches high.

Krider's EVERBLOOMING ROSES

**HUNDREDS OF BLOOMS IN YOUR
GARDEN—ON EVERY PLANT**

Floribunda Roses make a tremendous showing all season long—the upright, bushy plants are covered with great clusters of brilliantly colored flowers continuously from June until frost. Use for borders, among evergreens, in Rose beds—everywhere you want a splash of color. They are also fine for planters or in front of picture windows. And the large, bright, double flowers are excellent for cutting too. One stem makes a bouquet. Because of these fine qualities, Floribunda Roses have become the most popular class of Roses.

2315 CIRCUS. A constant panorama of color changes from spring until the last glorious bud is frozen in late fall. Gold, orange, buff and hints of cerise take playful turns at painting the perfect petals. Grows to 30 inches in height. Hardy, prolific. **\$2.00 each; 3 for \$5.25.**

2154 FASHION. The most sensational new Rose to be introduced in years. Here is a Rose with everything . . . A lovely new color, coral suffused with gold; and an enticing "old rose" fragrance. Plants grow vigorously to medium height and produce an unusually great number of perfectly formed flowers from spring until late fall. Color is elusive and difficult to describe. Must be seen to be really appreciated. **2-yr., No. 1 plants, \$1.75 each; 3 for \$4.25; 12 for \$17.50, postpaid.**

2337 FIRE KING. 1960 All-America Winner. (Meiland, Plant Patent No. 1758) is a challenging vermilion whose 3-inch, very double blooms are borne on a lusty, upright plant in heavy clusters. Foliage rich green to set off the flaming blooms. For a blaze of color in your Rose garden, nothing can surpass the May-to-frost glory of this fine new Floribunda. **2-yr., No. 1 plants, \$2.50 each; 3 or more, \$2.20 each, postpaid.**

2160 FLORADORA. Characterized by extremely sturdy, vigorous growth and abundance of blooms. Color is a sparkling coral-orange-red in the open blooms. Buds are perfectly formed and open slowly after cutting. Not unusual for a clustering spray to have from 7 to 10 blooms open and a number of unopened buds at one time. Each plant bears literally hundreds of blooms during the long season from early June until freezing fall weather. **2-year No. 1 plants for bloom this summer, \$1.25 each; 3 for \$3.25; 12 for \$11.00, postpaid.**

2328 GOLD CUP. This new All-America winner for 1958 is distinguished for vigor, size, productiveness and healthy foliage. 2332 IVORY FASHION. 1959 AARS Winner. Early in June its long, slender buds begin to appear and open to a clear ivory-white with a faint touch of yellow. Flowers are long-lasting and open to a cup shape fully 4 inches across and have the breath-taking Tea Rose fragrance. **2-yr., No. 1 plants, \$2.00 each; 3 for \$5.25.**

2157 PINOCCHIO. Bloom from June until fall freezes. Flowers come in great clusters making them ideal for cutting and floral arrangements. The buds are perfect in form, richly colored a deep salmon flushed with gold at the base, and open very slowly into 1½-inch blooms so perfect they are really miniature Tea Roses. Planted in a bed, they make a flower garden by themselves. Plants are extremely hardy and vigorous in growth. 4134 "POOR MAN'S ORCHID"

IRIS SHILKA

Many years ago as a crowded, uncomfortable train puffed its way across the endless barren plains of Siberia, Prof. Hansen, an American passenger, was electrified by the sight of patches of what appeared to be Orchids blooming in that desolate region, near the small town of Shilka. As the train stopped at the station, Prof. Hansen left it to satisfy his curiosity. When he made a closer inspection of the plants he found them to be of the Iris family, but their form and color so closely resembled the Orchid that he immediately thought of the descriptive phrase, "Poor Man's Orchid." He secured several of the plants and brought them home to America with him. Several years of propagation and development showed them to be perfectly adapted to our climate and they were placed on the market under the name of **Iris Shilka**, recalling the name of the Siberian town where they were first found. **We offer nice field-grown plants, blooming size, 50c each; 4 for \$1.75, postpaid.**

"The Miracle Plant Food" RA-PID-GRO

USE RA-PID-GRO EVERY 2 OR 3 WEEKS throughout the season for the best results from both new and old plantings. Water thoroughly after fertilizing.

Ra-pid-gro is so easily prepared for use. Just add water at the rate of 1 pound of Ra-pid-gro to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around the plants according to directions on the bag. For use on small numbers of plants, mix at the rate of a teaspoonful to a quart of water. Also very valuable for use when transplanting. Dip plants in solution for 3 or 4 minutes.

Stop Expensive Transplanting Losses

By using a large tub or pail and mixing Ra-pid-gro with water at the rate of 22 gallons of water to 1 pound, you have a solution in which to dip the roots of the plants before setting out. If this is done, you will practically eliminate transplanting losses. Trees, shrubs, roses, evergreens, and similar plants should be set in the solution 3 to 4 minutes. Berry plants 1 minute. Vegetable and house plants just dip and remove. Grass and vegetable seeds should be sprinkled with Ra-pid-gro before sowing. Use the solution for watering after setting out plants or sowing seed.

A BIG STEP FORWARD—Root Fed Plants

As you well know, any living plant suffers a shock and is set back when transplanted, especially when the soil in which it grew is removed from the root system. Any plant furnished by any nursery has to re-establish itself and start growth over again. To help a plant survive and get under way again fast, Krider treats each plant before shipment with a special Krider formula known as PZ (Plant Zest).

It's Easy to Order by Mail from KRIDER'S

You can relax in the comfort of your home while you order by mail from Krider's, and it's so easy to find what you want because this one catalog offers more new and better plants than half a dozen local stores or nurseries could offer. Look at the time and money you save by ordering all your needs from one source. Your whole family can enjoy your plantings more if they have a part in selecting them.

PLANTING INSTRUCTIONS

If you order from Krider we send full and complete planting instructions with each order.

This is a service which makes it easy for even a novice to grow beautiful plants and flowers.

Sometimes the nature of your order necessitates it being shipped in more than one package. In that event instructions covering the particular types of plants contained therein will be sent with each package.

Order from Krider and be satisfied.

3104 GIANT ROBINSON

Robinson is a variety we have fruited for several years, each year we think more and more of it. It is a tremendous producer, starts ripening about the time Dunlap is finishing. Bears so heavily you will have plenty left for canning or freezing. 25 for \$1.25; 100 for \$3.50; 500 for \$12.00; 1000 for \$20.00, postpaid.

3102 EARLY PREMIER

Is by far the most popular extra early Strawberry. It is our first variety to ripen. Very productive and produces berries for many days. Berries are very large, firm, rich red color and good quality. Because the blossoms are frost-resistant, it is a sure bearer. Plant some for the first ripe Strawberries, for eating fresh and for canning or preserving. 25 for \$1.50; 50 for \$2.00; 100 for \$3.75; 1000 for \$22.00, postpaid.

3129 SPARKLE or BUSH STRAWBERRY

We call it BUSH STRAWBERRY because the fruit grows on stems standing straight up from the ground. Ripe berries never touch the soil and are never touched by crawling bugs nor full of dirt or sand before picking, such as on all other varieties. Sparkling radiant red. A real beauty, beauty that is more than skin deep because Sparkle is red clear through. The fruit is large, firm, sweet and of excellent flavor and one of the highest yielding varieties we know of. Excellent for freezing and shipping because of its firmness. Is fast becoming a favorite of home and commercial growers alike. 25 for \$1.75; 50 for \$2.50; 100 for \$4.00; 500 for \$15.00; 1000 for \$25.00, postpaid.

A BIG STEP FORWARD . . .

Introducing Nursery Treated Nursery Root Fed Plants - - - FOR MORE RAPID GROWTH -- A MORE BEAUTIFUL GARDEN

ONLY KRIDER NURSERIES GOES TO
THIS EXPENSE TO GIVE YOU THE BEST,
TO GIVE YOU PLANTS THAT THRIVE
BETTER . . AND AT NO EXTRA COST TO YOU

As you well know, any living plant suffers a shock and is set back when transplanted, especially when the soil in which it grew is removed from the root system. Any plant furnished by any nursery has to re-establish itself and start growth over again. To help a plant survive and get under way again fast, Krider treats each plant before shipment with a special Krider formula known as PZ (Plant Zest).

WHAT DOES THIS MEAN TO YOU?

It means that you get super Krider Nursery stock (the finest money can buy) that develops faster into stronger healthier specimens. All Krider plants are root fed with PZ before shipment. The root doctoring materially helps to stimulate growth. There is an immediate supply of active elements on the root system that are essential to plant life. The plant doesn't have to struggle so hard for food elements while getting under way, and this boost treatment by Krider really pays off, in giving plants a decided advantage for life and growth over non-treated ones. They are, so to speak definitely fortified against adverse conditions.

Blooms Spring and Fall

8602 **CHRISTMAS HOLLY** (Ilex Opaca)
FOR HAPPY HOLIDAYS GROW YOUR OWN CHRISTMAS HOLLY

KRIDER'S SEXED TREES. MALE AND FEMALE. GUARANTEED TO PRODUCE BERRIES.

Holly is beautiful the year around, but in winter when other evergreens become drab and brownish it is the one plant in your garden that sparkles. The leaves are deep dark green and the brilliant red of the berries really stand out against this background. After years of study, selection and breeding, we have succeeded in propagating separate species, male and female, which are extremely hardy and easy pollinating to assure plenty of berries. **If you are to have berries on your female Holly you must have a pollinating male companion.** Christmas Holly will do best in partial shade. Plant in any good garden soil. The use of leaf mold or peat moss in planting and later as a mulch is recommended. Holly can be used any place in your garden where you would plant a pyramidal evergreen, but we recommend planting where it may be seen from your windows.
